

INTRODUCTION

The product guide is intended to provide general information on infant formulas and medical foods. For more detailed information, refer to the appropriate product website (as listed below). Non WIC approved categories (including frozen products and oral electrolyte maintenance solutions) have not been included in this product guide. USDA also maintains a product guide (<http://grande.nal.usda.gov/wicworks/formulas/FormulaSearch.php>).

Monthly maximum WIC issuance is based on the following table (from <http://www.fns.usda.gov/wic/benefitsandservices/foodpkgregs.htm>).

INFANT FORMULA

Physical Forms	Maximum Monthly Allowance
Concentrated liquid	403 fluid ounces
Powdered	8 pounds
Ready-to-feed (RTF)	806 fluid ounces

Medical food maximums for children/women: 455 oz concentrate, 9 pounds powder, 910 oz RTF. To determine maximum amounts for multiple physical forms, please contact a state RD.

Addendums to the product guide include 1. Milk/juice section, 2. List of metabolic formulas, 3. Excel spreadsheet of infant formula/medical food categories (3 sheets).
